

# ASP.Net Developer

---

## *Job Description*

### **Position Overview:**

**Title:** ASP.Net Developer  
**Reports To:** Team Lead  
**Location:** Surry Hills

### **Role Objective**

“Create simply smarter software solutions that differentiate us from our competitors by developing a product that is intuitive, highly functional, very user-friendly and solid.”

### **Position Scope**

Want to work for a company with a great work culture?

Want to help build some of the smartest sites out there for our market leading clients?

We're on the lookout for a passionate, creative-minded individual with a real passion for web development. A great work ethic and passion to own and deliver a fantastic product are a must for this role.

You will have extensive ASP.Net experience and experience building web sites and online systems. Web development experience with ecommerce and online payment gateways will give you a great advantage in this role. You will be responsible for all estimation, scoping, technical delivery and QA on project work.

Excellent communication skills, both written and verbal are essential for this role.

You must have a high level of understanding of emerging web technologies with a demonstrated ability to solve technical challenges for varying project requirements. The ability to be self-directed and motivated is paramount. You must be able to perform under pressure and consistently provide and create work of the highest standard.

### **Key Abilities**

The ideal candidate:

- Can be enthusiastic and passionate about web application development
- Can work well with other team members and clients

- Can communicate effectively with a variety of people, including clients at all levels
- Can provide accurate effort estimation and is able to work towards estimates
- Can display working knowledge in emerging web development technologies and new products
- Is continually providing efficient, bug free and exceptional solutions and code
- Actively and valuably contribute to greater team education and training process
- Actively and valuably contribute to development process improvement and standardisation as well as the quality assurance process
- Has an attention to detail and a focus on delivering quality
- Understands and can respect professional confidentiality

## Key Skills and Experience

The ideal candidate will have:

- At least 3 years industry experience in front end web development
  - Expert skills in Microsoft ASP.net and MVC web technologies
  - Expert C# skills
  - Expert MS SQL Server skills
  - A thorough understanding of the concepts behind object oriented programming and several years' experience implementing OOP concepts with ASP.Net
  - Experience with performance optimization techniques and ASP.Net/SQL Server development best practices
  - Experience working with e-commerce sites and payment gateways
- A clear understanding and advanced level knowledge of
  - Front end web technologies; jQuery, AJAX, JavaScript, HTML, CSS, XML
  - Emergent web technologies HTML5/CSS 3
  - Mobile development technologies
- Previous experience working within the web/internet industry
- Exceptional customer service and communication (verbal and written) skills
- Excellent organisational and prioritisation skills

## To Apply

Please keep the following in mind when applying:

1. All applications are carefully considered
2. Please include a portfolio of recent front end development work along with your resume
3. A 1-2 hour mock cut-up technical assessment is required for applications who are of interest
4. Australian or permanent resident's only please
5. No recruitment agencies
6. Apply at our [careers page](#) online.
